Behance - [behance.net/sumudus](https://www.behance.net/sumudus)

User-centered and impact-driven UX Designer with 4+ years of experience designing mobile and web applications across tourism, telecom, fintech, and e-commerce sectors. Skilled in usability testing, prototyping, and systems thinking, with a proven ability to bridge design and development teams in agile environments. Strong advocate of scalable design systems, accessibility, and enterprise UX practices. Passionate about delivering intuitive, data-informed experiences that meet both user and business goals.

Work Experience

UI/UX Specialist | Bizgrow Digital Australia | [September 2024 - Present](#)

- Led end-to-end UX design for a web & mobile tourism platform in Australia, improving usability and conversion.
- Conducted qualitative user interviews and iterative usability tests to drive design decisions.
- Created responsive wireframes, user flows, and high-fidelity prototypes aligned with business KPIs.
- Collaborated closely with cross-functional teams in agile sprints to ensure design consistency and technical feasibility.
- Helped develop and scale a component-based design system across projects.
- Contributed to a scalable design system, maintaining visual consistency and speeding up delivery across projects.

UI/UX Designer | Dialog Axiata PLC | [April 2023 - March 2024](#)

- Led key UX improvements for the MyDialog app and MyAccount web portal serving over 1 million users.
- Translated research insights into intuitive user journeys, increasing task success rates and customer satisfaction.
- Conducted user research, synthesized findings, and applied usability testing to inform design iterations.
- Facilitated cross-team collaboration between product, development, and analytics to ensure alignment.
- Established and contributed to a centralized design language and reusable component library.

UI/UX Designer | HexCode Labs | [October 2021 - November 2022](#)

- Delivered end-to-end UX solutions for multiple web and mobile applications for local and global clients.
- Developed wireframes, UI layouts, and responsive design systems focused on user needs and business logic.
- Participated in stakeholder workshops, usability testing, and agile design cycles to validate and improve designs.
